Says

What have we heard them say? What can we imagine them saying?

 The airlines needs to be like road transports, they should give their transport facility in between the district

and rural areas in low .cost

 The people of india wants the government to take the Air transports and enable them to reach the villages.

- AIR TRANSORT says that in a decade the transport will be cheap and cost effeciive.
- If this happens in a decade the transport in india would be in another level

 The air transport says the travel time for the people to other countries will be reduced by their transport, so it is best to use this air transport

- The Global Transportation today, cost high because the airlines are less in number and the people using airlines are really less.
- So to develop the air transport the government should take the control of airlines to give it in low cost for the common man.

Unlocking Insights Into The Global Air Transportation Network

- The Air Transportation says the their biggest fear is that the communication during the rainy season with thunder storms is very tough.
- The network for communication would be lost in such a situation.
- Another thing the Transport meets is the roots for the airplanes to navigate to places.
- Their is no landmarks for the airplanes to see on the air, they have to navigate to the places by the instructions given by the airport officers.

- The airplanes are now using the jet fuels.
- The cost of the fuel is nowadays higher then the fuel used for road vehicles
